

Solien Technology Announces Its Membership in the Microsoft Gold Certified Partner Program

Santa Monica, California – May, 2002 — Solien Technology, a technology firm providing customized web-based applications, software development, intranet and business-web applications, today announced it is a new member in the Microsoft Gold Certified Partner Program. Solien has been named as a Microsoft Gold Certified Partner for Collaborative Solutions due to its competence in the latest Microsoft technologies and its proven track record of customer satisfaction. Membership in the Microsoft Gold Certified Partner Program will provide Solien with resources to help it develop and deploy robust collaborative solutions that will help customers better manage their company's data.

“Solien is extremely pleased with our new status as a Microsoft Gold Certified Partner for Collaborative Solutions,” said Jeanine Flanders, President of Solien Technology. “Being a Gold member of the program allows us to clearly promote ourselves to clients as having proven expertise in providing high-quality collaborative solutions. The benefits provided through our Gold membership will allow us to continue to enhance the services that we provide.”

The Microsoft Gold Certified Partner Program provides a way for customers to identify companies that have proven their commitment and expertise in one or more specialized areas when delivering Microsoft technologies, including Exchange 2000 Server, ISA Server and SQL Server™ 2000.

Microsoft Certified Partners who meet the highest set of criteria, including advanced certification and a portfolio of real-world customer references, are identified as Gold Certified --the most skilled partners in specific solution areas.

“Core to most business challenges today is developing a reliable system to round up, manage and utilize data within their organization that allow better data tracking and dissemination from legacy data stores to new systems,” said Rosa Garcia, general manager of the Partner Programs Group at Microsoft Corp. “Microsoft recognizes that companies want a technology partner who has experience in this business of managing critical company data. Today, Microsoft recognizes Solien Technology for demonstrated customer satisfaction with prior successes with these critical deployments. This distinction brings value to the Microsoft Gold Certified Partner Program and makes it clear that Solien Technology has the skills and experience to provide high-quality collaborative solutions on Microsoft technology.”
